INTRODUCTION

Aim:

This report intends to present information on Notia and Kambiland air assets, organization and locations. Second part of the report intend to present information about their capability.

Squadron locations

LEGEND:

- 60th Division (A-A)
- 70th Division (A-G)
- 80th Division (Support)
- 40th Division (Maritime)
- 30th Division (DRK)

SEVEROMORSK 1

- A-50 SQN (822)
- SU-33 SQN (452)
- SU-33 SQN (451)
- SU-34 SQN (461)
- SU-34 SQN (462)
- TU-142 SQN (471)
- TU-142 SQN (472)

SEVEROMORSK 3

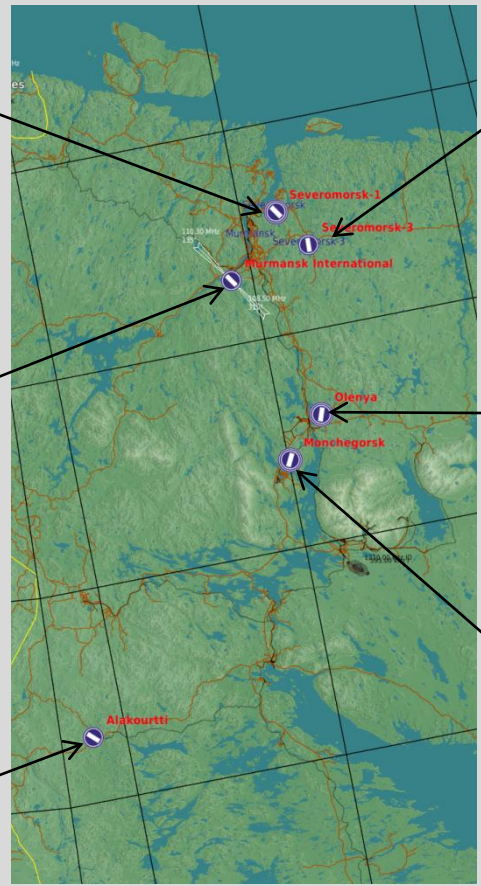

- MiG-29S SQN (711)
- MiG-29SSQN (712)
- SU-34 SQN (721)
- SU-24 SQN (731)
- MiG-31 SQN (622)
- SU-27 SQN (612)
- MiG-29 SQN (601)

MURMANSK

- SU-27 SQN (611)
- IL-76 SQN (801)
- IL-76 SQN (802)
- AN-26B SQN (803)
- IL-78 SQN (831)
- YAK-40 SQN (811)

ALAKURTI

- MiG-29 SQN (311)
- MiG-25 SQN (312)

MONCHEGORSK

- SU-30 SQN (701)
- SU-30 SQN (702)
- SU-34 SQN (722)
- SU-24 SQN (732)
- MiG-29 SQN (602)
- MiG-29 SQN (603)

OLENYA

- TU-22 SQN (741)
- TU-22 SQN (742)
- TU-22 SQN (743)
- TU-160 SQN (751)
- TU-95 SQN (752)
- A-50 SQN (821)
- MiG-31 SQN (621)
- SU-27 SQN (613)

Doctrine

Air operations: General

The Notian Air Force have two primary objectives:

1. Defend Notian territory
2. Project power to Notian enemies

Notian Air Force have a centralized command and control than coalition airforces. This means that Notian air operations are more scheduled and will often come in waves. The Notian forces have low training and skill level for conducting decentralized COMAO (Combined Air Operations = package operations).

Once a aircraft is airborne it is not being controlled in air, and will execute its mission as briefed. The only exception is fighters and interceptors being controlled from GCI as part of the Notian IADS.

In the case of a major Notian air operation, expect A-A sweep to be sent in first, followed by A-G aircraft doing strikes. Their ability to support with SEAD or Escort is a intelligence gap.

Air operations: A-G

Notian Air Force has a very limited if not absent inter-agency coordination between the Air Force and ground forces. Ground forces have limited means to cooperate with the Air Force, and different Districts cannot operate together on high tempo operations. This is due to organization design, command structures, lack of specific training and focus for the ground forces.

For major ground offensives assault aviation squadrons will contribute to shaping the battlefield prior to the start of the Notian ground attack. Once the Notian ground attack is moving forward, the assault aviation squadrons will not conduct CAS operations. Assault aviation squadrons will then be used further ahead from the attack in a AR role, or keeping the enemy busy by attacking elsewhere.

When Notian ground forces are in defensive positions, and are fairly static, they can use CAS to attack against incoming enemies.

Air operations: A-A / Air Defense

The Notian Air Force's most important objective is to defend the Notian territory and because of this part of the Notian Air Force is tied into the Notian Integrated Air Defense System (IADS). All interceptor squadrons are tied directly to the Air Defense, while the Fighter Squadrons rotate in taking turns flying Defensive Counter Air (DCA) missions in various parts of Notian to ensure a high readiness of fighter aircrafts to support against any aggression toward Notian territory.

DCA CAP operations is normally forward staged as part of the layered defense where CAP is first line of defense, second line of defense is interceptors being scrambled from airbases and the third line of defense is the IADS network.

Command and Control

Notian Air Force Headquarter

- Work with long term plans, training, budgeting and will have no effect on the short term.
- If destroyed will reduce ability to train new pilots, introduce new aircraft, weapons and systems.

Air Division Headquarter

- Plans and execute major Notian air operations.
- If destroyed, the squadrons belonging to that division will not be able to participate in major air operations until a new division headquarter is operational (COMAO).

Ground Controlled Intercept (GCI)

- Normally located in a sector command center (SCC) as part of the Integrated Air Defense System (IADS).
 - GCI Supports the Syrian Air Defense with control of fighters and interceptors conducting Defensive Counter Air (DCA) operations.
- If destroyed:
- May prevent scrambles of intercept aircraft
 - May lead to intercept aircraft flying to wrong areas
 - May lead to lower quality of flying from intercept aircraft due to lack of GCI support

Mission type capability

Fighter squadrons conduct the following mission sets:

- Sweep
- CAP
- Escort

Interceptor squadrons are based at airfields and tied to Notian IADS and supports as Quick Reaction Alert flights to protect Notian airfields from attack.

Assault Aviation squadrons conduct the following mission sets:

- CAS (with ground forces in static positions)
- AR
- AI
- Can perform limited A-A missions

Bomber Squadrons conduct the following mission sets:

- AI
- Strikes
- A-A only in self-defense

Heavy Bomber Squadrons

- Strategic strikes against high value targets

Naval Fighter Squadrons

- Sweep, CAP and escort for maritime operations

Maritime Strike Squadrons

- A-G operations in support of amphibious operations
- Anti-surface attacks
- Can perform limited A-A missions

Maritime Patrol Squadrons

- Reconnaissance and locating enemy submarines
