

VIRTUAL INTELLIGENCE SERVICE

VICTORIA PER INTELLECTUM

INTELLIGENCE REPORT 18-001

INFORMATION:

In the cover of darkness last night, a small friendly screening force that was located as shown on the map below was in contact with the enemy, and we lost contact with them afterwards.

A couple hours later a convoy that was sent forward to assist and identify what was happening, but after they reported they were in contact with the enemy we lost comms with them.

ASSESSMENT:

It is likely that a large maneuver force is moving SOUTH on the easter axis toward friendly forces. This movement seem to be aligned with 151st Armored Regiments movement SOUTH toward our main friendly force.
